Extra large soft rubber decks provide plenty of space for both children and helpers @1m x 1m. These unique 9mm rubber decks, chemically bonded to a steel core, are slip resistant and low noise.

Play features:

- 1.2m Rope Climb
- Rope Climb Barrier
- Level Drag Ramp
- Inclined Drag Ramp
- Curved Seat
- Hoop Bridge
- Corner Seat
- Table
- Vertical Net
- Climbing Wall
- 1.8m Fireman's Pole
- Large Square Deck
- 1.2m Inclusive Slide
- 1.4m Wide Net Climber
- 1.4m Wide Seat
- 1.2m High Wide Stairs

Rounded slides
are not just wide, but tunnel shaped, allowing children to not only feel secure and hold onto the sides, but to also go faster. The top and bottom of the slides are specially designed to make transfer to and from wheelchairs easier

02

Ramp & slide sequence

Challenging Activities
Agility accesses include a 2.4m high vertical net, a climbing wall, hoop bridge and a rope climb.

A series of inclined bridges/ramps provide access to the central seating area.

Drag ramps
with handrails at two heights allow able bodied children to simply walk up whilst the less mobile can use their upper body strength to climb using the rope and soft grips. The tunnel shape controls the direction of movement whilst the transfer platform at the bottom provides easy access – even from a wheelchair.

Social Seating
offers two opportunities of sheltered seating, ground level and on the main deck.

- Equipment List**
- 01. PZW685 Climber for all
 - 02. SWB081 2.4m High Swing with Inclusive seat
 - 03. SWB081 Thermoplastic Hopsotch
 - 04. DZW445 Spin dice panel and thermoplastic snakes and ladder

No.	Code	Description
01	PZW685	Climber For All
02	SWB081	2.4m High Swing with Inclusive seat
03	SWB081	Thermoplastic Hopsotch
04	DZW445	Spin Dice Panel

Inclusive access stairs.

Shuffle decks
are ideal for allowing children to crawl onto a unit or for easy side transfer from a wheelchair. At only 150mm apart they are inclusive and suitable for toddlers too.

Large net climbs
with a small mesh net and a shallow incline are big enough to take helpers. The lower part is horizontal and can be used as a sensory bed for less mobile children to lie on and feel vibrations whilst other children play on the net. Scramble nets are made from polypropylene steel cored multi filament rope, all ends are crimped with aluminium ferrels and junctions with stainless steel or egg tee connectors.
